CAS Clinical Research II

A postgraduate educational program offered
by the Clinical Trial Unit (CTU) Basel

ADVANCED STUDIES

Advanced Clinical Trial Management

This program covers advanced topics of operational clinical trial management and prepares clinical research professionals for enhanced functions and responsibilities. Specifically, the principles of state-of-the-art project management, the multi-faced challenges of translating a trial into multicenter and international settings and new technological solutions for enhancing the efficiency of clinical research projects are discussed.

Possibilities of patient engagement and their influence on the success of a project are presented and interpersonal competences in communication and conflict management are strengthened.

Target audience

This program has been specifically developed for

- candidates with a science or medical degree (minimum Bachelor's degree)
- candidates without a university degree but with a professional qualification ('abgeschlossene Berufsausbildung' or similar) and at least five years of practical work experience in clinical research (based on 'sur-dossier' decisions).

Very good command of oral and written English is a pre-requisite for admission to the program.

Completion of CAS Clinical Research I, CAS Study Nurse/Coordinator or equivalent training is recommended.

Course fee

CHF 6'000

The course fee contains all course materials, provision during tea/coffee breaks and overhead fees.

The Department of Clinical Research at the University of Basel supports all members of registered clinical research groups by granting reduction in course fees. Please find more information on our website dkf.unibas.ch/en/education.

Registration

Details on the application process, course dates and further information are available on dkf.unibas.ch/en/education

The number of participants is limited. Applications will be considered based on the date of receipt.

Structure and elements of the program

CAS Clinical Research II, 11 ECTS, Duration: approx. 10 months

Module 1	Ethical and Legal Aspects of Clinical Trials
Module 2	Clinical Study Project Management
Module 3	Advanced Clinical Trial Management
Module 4	Communication, Collaboration and Partnerships in Clinical Research
Work-shadowing	Planned individually

Teaching modules comprise of

- online courses
- classroom training with lectures, practical exercises and group discussions
- multiple choice tests at the end of each module
- homework assignments

The work-shadowing is a one-week internship which serves the purpose of gaining insights into the daily work life in a clinical research profession. The work-shadowing is organised independently by the students and can be completed at

- academic clinical research sites (located mostly at university hospitals)
- pharmaceutical or biotech companies
- consulting companies (clinical research organizations, regulatory affairs agencies, etc.)
- regulatory agencies
